This Senior Design Project is brought to you for free and open access by the School of Engineering, Technology and Computer Science Design Projects at Opus: Research & Creativity at IPFW. It has been accepted for inclusion in Computer and Electrical Engineering Technology & Information Systems and Technology Senior Design Projects by an authorized administrator of Opus: Research & Creativity at IPFW. For more information, please contact admin@lib.ipfw.edu.

Portable Metal Detector
Final Report

Presented To: EET Faculty
From: Michael L. Shoemaker
Date: April 24, 1987

TABLE OF CONTENTS

List of Figures	ii
Abstract of the Portable Metal Detector	iii
1.0 Introduction	1
1.1 Statement of the Problem	1
1.2 Objective of the Report	2
1.3 Plan of procedure for the Report	2
2.0 Technical Research on Methods of Detecting Metal	2
2.1 Resonance	3
2.2 High Frequency Pulses	4
2.3 Magnetic Field Variations	5
3.0 Description of the Circuits Functional Blocks	7
3.1 The Voltage-Controlled Oscillator Block	7
3.2 The Comparator Block	9
3.3 Audio Oscillator Block	10
3.4 Description of the Audio Output Circuitry	12
4.0 Operation of the Portable Metal Detector	15
4.1 Getting the Metal Detector Ready to Detect Metal	15
4.2 Adjusting Frequency Switch Settings	16
5.0 Meeting the Goals of the Project	17
5.1 Meeting the Goals of Being Light and Portable	18
5.2 Keeping the Costs Reasonable	18
5.3 Meeting of the Goal of Detecting Different Metals	19
6.0 Conclusion	19
Appendix A: Proposal for the Portable Metal Detector	20
Appendix B: Calculations and Formulas	24
Appendix C: Schematic of Circuit and Data Sheets	29
Appendix D: Cost Breakdown for the Metal Detector	34

LIST OF FIGURES

2.1	Magnetic Field Pattern of Coil	5
3.1	Block diagram of Circuit	7
3.2	555 Connected as VCO	8
3.3	Voltage Control for the VCO	9
3.4	Arrangement of coils for the Search Head Assembly	10
3.5	Diagram of Detection Circuitry	11
3.6	Diagram of the Audio Oscillator	13
3.7	Diagram of the Audio Output Circuit	14
4.1	View of the Top Panel Layout	16

All figures were drawn by me, at General Electric, with the Hewlett-Packard Electronic Graphics System.

ABSTRACT FOR THE PORTABLE METAL DETECTOR

This report is the final report for Senior Design I and II. The report presents information on my project, the portable metal detector. In the report I present research done in order to gain background knowledge, the circuitry developed, operation procedures, and the ability to meet the goals established at the beginning of the project.
